

S-MIX control software

S-MIX500

Features

- ▼ Support to have one PC input to show different contents on the video wall
- ▼ Support scrolling subtitle
- ▼ Support the video/image/web/doc etc contents uploading
- ▼ Support the image/video polling
- ▼ The PC minimum requirement is Windows 7 and RAM at least 4G

This is a Windows PC based software which can be used for the video wall contents, support the video, image, WEB, doc, subtitle etc those sources to upload to the software and then have those sources to show on the specific window/screen on the video wall. The software itself is free, but only active for 30min, if need to use this for lifetime, will need to purchase the USB key or bind the PC MAC address.
